Swivel 210

Max. log diameter	1400 mm
Max. opening betwen blade guides	210 (420) mm
Log length standard model	6,1 m
Min. log length	1 m
Saw disk motor	15,5 kW
Saw disk	570 x 5,2/3,8 x 408
Weight standard model	500 kg

DESCRIPCIÓN DEL PRODUCTO

Circular Blade Swivel Saw. Designed for sawing logs of diameters (up to 1,4 m). It's mobile design enables the setting-up right in the heart of the forest where big logs can be converted into lumber on the spot.

Swivel has a single circular blade which saws horizontally on the forward run, is then swung through 90° and saws vertically on the return. As both runs are productive, no time is wasted on carriage return or turning the log to produce square edged timber (max. 210 x 210 mm). The 570 mm diameter tungsten carbide tipped blade produces a smooth finish and the teeth remain sharp for very long periods. To provide quality and reliability, the sawmill is equipped with the 15.5 kW HONDA petrol engine. Easy to install and operate.

The saw is not approved to operate on EU territory.
